

HTC Merge™ - Portable Wi-Fi Hotspot

1. From the Home Screen tap the **ALL APPS** icon

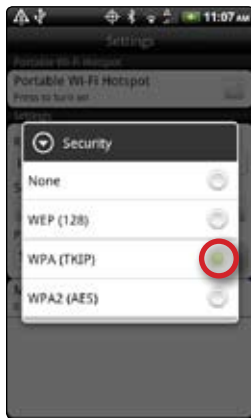

2. Scroll to and tap **Wi-Fi Hotspot**

3. The first time you open Wi-Fi Mobile Hotspot, a brief introduction describing the application is displayed. Tap **OK**

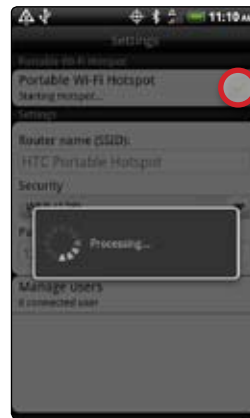

4. Enter a Router name (SSID) to easily identify your phone's Wi-Fi network, or use the default name

5. Under Security, select the security protocol you want to use from the list, or select None to create an unsecured Wi-Fi hotspot

6. Enter a WEP key to use to secure the Wi-Fi network, or use the provided default WEP key. The WEP key must be 10 digits long

7. Tap Portable Wi-Fi Hotspot to enable your phone as a wireless router

8. The Wi-Fi Hotspot icon (●) appears in the status bar and a screen displays instructions for connecting your computer. Follow the instructions to connect your computer or other device to your phone's Wi-Fi hotspot

*A Tethering Plan is required to use the phones Portable Wi-Fi Hotspot functionality. Please contact your carrier for more information.
