ANDROID™ 2.2 “FROYO”

UPGRADES INCLUDE:

Improved Home screen – Use dedicated shortcuts for instant access to phone functions, applications and the web browser.

Microsoft® Exchange Support – Sync email, integrate your calendar and rest easy with enhanced security features.

Performance Boost – Enjoy faster website loading and smoother multitasking.

microSD™ Card App Storage – Save to and run apps from your memory card to free up space on your phone.

More Google Mobile™ Services – Add more integrated Google™ Services like Google Quick Search Box, Latitude™, Maps™ Navigator, Places™ and more.

Samsung Media Hub Support – Rent or buy movies and TV shows, and don't wait to watch with progressive downloads.

Adobe® Flash® 10.1 – Enjoy a richer web experience with streaming media and game.

Portable Wi-Fi® Hotspot – Share high-speed connectivity with up to five other devices.

Once you upgrade your Mesmerize you can launch Portable Wi-Fi® Hotspot to allow other devices to use your 3G internet connection.

1. From the **Wireless & Network Settings** menu, touch **Portable Wi-Fi Hotspot**.
 2. Touch **Portable Wi-Fi Hotspot** to launch Portable Wi-Fi Hotspot. Read the information about Portable Wi-Fi Hotspot, then touch **Accept** to proceed.
 3. Portable Wi-Fi Hotspot consumes battery power. Read the information about battery usage, then touch **Turn on Portable Wi-Fi Hotspot** to proceed.
 4. Your device establishes a connection to the network for the Portable Wi-Fi Hotspot.
 5. Activate Wi-Fi on your PC or other device, then follow the prompts on your device to connect.
- Tip: Your device's default password is your device number.
6. When you are finished using Portable Wi-Fi Hotspot, touch **Portable Wi-Fi Hotspot** to close the application.

Note: The use of Portable Wi-Fi Hotspot requires that you are on the appropriate data plan prior to use.
