

U.S. Cellular® Home Phone Device Installation

Before You Begin

Your device works exclusively with the U.S. Cellular® network and DOES NOT use your home's phone wall jacks. Your device should be located:

- Where you have a strong cellular signal from a cell tower, typically near a window or outside wall.
- Near an electrical wall outlet.

Installing the Battery

1. Remove the cover from the battery compartment.

2. Insert the battery connection cable into the battery port.

3. Place the battery in the battery slot and replace the battery cover.

Note: Install the battery before using this device. If the battery is not installed the device will not power on

Installing the Power Adapter

1. Plug the power adapter into an electrical wall outlet.
2. Insert the small end of the power adapter into the power port on the back of your device.
