

MiFi® M100 Mobile Hotspot by Novatel Wireless

Navigating the device

Powering On Your MiFi M100

After installing the SIM card, align the gold-colored contacts on the battery and the device and gently slide the battery into place.

Connect the MiFi M100 to the power cable and charge until the battery is fully charged. You can also connect the device to your computer's USB port for charging. Press and hold the **Power** button to turn on the MiFi M100. All of the LEDs will illuminate to indicate that the device has powered on. After initialization, the corresponding Battery and Signal Status LEDs will appear.

Turning Your MiFi M100 Off

Press and hold the **Power** button until all the LEDs turn off on your MiFi M100 device.

Resetting Your MiFi M100

To restore your MiFi M100 to factory settings, first verify that your MiFi device is powered on. Remove the back battery cover and find the RESET button. Leave the battery inserted and the MiFi turned ON. Press the Reset button with an unfolded paperclip and hold for 3 seconds. Replace the battery cover and wait for device to cycle back ON.

NOTE: All settings will return to the original factory default settings. Any changes you have made will be lost and you will need to use the SSID/Password printed on the sticker inside the battery cover to connect to Wi-Fi and to log into the Admin dashboard.
