Tethering and Portable Wi-Fi® Hotspot

1. To use tethering, from the home screen and with Genesis connected to a computer with a USB cable, press the Menu Key.

2. Touch Settings.

4. Swipe up to scroll down.

5. Touch Tethering & portable hotspot.

6. Touch USB tethering.

7. Review the introduction for tethering and touch Agree.

8. Genesis is now tethered to the computer to provide it with a data connection. To end the tether, just touch USB tethering again.
9. To have Genesis serve as a portable Wi-Fi hotspot, it does NOT need to be connected to a PC with a USB cable, and it should not be connected to a Wi-Fi network. From the Tethering & portable hotspot menu, touch Portable Wi-Fi hotspot.

10. Review the introduction for portable Wi-Fi hotspot and touch Agree.

11. To protect your hotspot, you should create a password for it. Touch Portable Wi-Fi hotspot settings.

12. Touch Configure Wi-Fi hotspot.

13. Your password defaults to your phone number. You may change the password by touching the Password field and entering a new password. Touch Show password to review your password. Any device attempting to connect to the network will need to enter this password. Touch Save.

Note: A tethering data package is required for Tethering and Portable Wi-Fi Hotspot usage.
