Portable Wi-Fi® Hotspot and USB Tethering

When you use your phone as a hotspot, other devices—such as laptops, eReaders, tablets, and other Wi-Fi® capable items—can use your phone’s internet connection. Please note that this feature requires a subscription to a tethering plan.

Using the Samsung Galaxy Axiom™ as a Wi-Fi Hotspot

2. Next to Portable Wi-Fi hotspot, move the slider from Off to On (gray to green).

3. Review the introduction to the hotspot and touch Accept.

   Note: Upon first activation, review the alert that enabling portable Wi-Fi hotspot will turn off Wi-Fi. Touch OK.

4. Touch Configure.

5. On any Wi-Fi capable device, find the network created by the Samsung Galaxy Axiom™ and select it to connect to the portable hotspot.
USB Tethering

The Samsung Galaxy Axiom™ can also share an internet connection with a computer over a USB data cable. Please note that this feature requires a subscription to a tethering plan.

1. Insert the USB end of the cable into the USB port on the computer. Insert the other end of the cable into the charging port on the phone.

3. Touch the checkbox next to USB tethering. A green check will appear in the box when the feature is on.

4. Review the introduction to tethering and touch Accept.

5. Your Galaxy Axiom will indicate that it is now tethered, and your computer will automatically install a driver for your phone.

6. Simply uncheck the checkbox next to USB tethering to stop tethering.
