**S Pen**

An S Pen™ is provided for use with this device.

For more information, see “S Pen” on page 34.

**Finger Scanner**

Use fingerprint recognition as an alternative to entering passwords in certain apps. You can also use your fingerprint to verify your identity when logging in to your Samsung account.

For more information, see “Fingerprints” on page 146.
Getting Started

Assemble Your Device
This section helps you to assemble your device.

Install the SIM Card and a Memory Card
When you subscribe to a cellular network, you are provided with a plug-in SIM card. During activation, your SIM card is loaded with your subscription details.

Warning: Small components such as SIM and memory cards can pose a choking risk. Please be careful when handling these cards to avoid damaging them.

You can also install an optional microSD™ memory card (not included) to add more memory space to your device.

1. Insert the removal tool into the hole on the SIM card/Memory card tray, and then push until the tray pops out.

Caution: Be careful when using the removal tool to eject an internal card tray.

2. Place the SIM card on the tray.

- Make sure that the card’s gold contacts face down into the device and that the card is positioned as shown.
3. Place the memory card on the tray with the gold contacts facing down.

4. Slide the SIM card/Memory card tray back into the slot.

---

**Charge the Battery**

Your device is powered by a rechargeable, standard Li-Ion battery. A USB charger (charging head and USB cable) is included with the device for charging the battery from any standard outlet.

The battery comes partially charged. You can use the device while charging.

1. Insert the USB cable into the USB charger/Accessory port.

---

Set Up Your Device
**Caution:** Use only charging devices and batteries approved by Samsung. Samsung accessories are designed for your device to maximize battery life. Using other accessories may void your warranty and may cause damage.

2. Connect the USB cable to the charging head, and then plug the charging head into a standard outlet.

3. Unplug the charging head from the outlet and remove the USB cable from the device when charging is complete.

**When to Charge the Battery**

When the battery is low and only a few minutes of operation remain, the device sounds a warning tone at regular intervals.

In this condition, your device conserves its remaining battery power by dimming the screen.

When the battery level becomes too low, the device automatically turns off.

For a quick check of your battery level:

- View the battery charge indicator located in the top right corner of your device’s display. A solid color (□) indicates a full charge.

You can also choose to display a percentage value. Viewing a percentage value can provide a better idea of the remaining charge on the battery. For more information, see “Battery” on page 133.

While charging, the device and the charger may become hot. This does not affect the device’s lifespan or performance and is in the device’s normal range of operation.

The charger may stop charging if the battery becomes too hot.
If the device heats up while charging the battery:
1. Disconnect the charger from the device and close any running apps.
2. Wait for the device to cool down and then begin charging the device again.
   - If the lower part of the device overheats, check for damage to the connected USB cable. Replace the damaged USB cable with a new Samsung-approved cable.

Start Using Your Device

Turn Your Device On or Off

The instructions below explain how to turn your device on or off.

To turn the device on:
► Press and hold the **Power** key until the device turns on.

To turn the device off:
1. Press and hold the **Power** key.
2. Tap **Power off**, and confirm if prompted.

Lock or Unlock Your Device

Use your device’s screen lock features to secure your device.

By default, the device locks automatically when the screen times out.

To lock the device:
► Press the **Power** key.

The default Screen lock on your device is Swipe. To choose a more secure screen lock, see “Set a Screen Lock” on page 145.
Set Up Your Device

To unlock the device:
► Press the Power key or Home key, and then drag your finger across the screen.

Restart the Device
If your device stops responding to taps or finger gestures and you are unable to turn it off, you can restart your device.
► Press and hold the Power key and the Volume down key at the same time for more than seven seconds.

Set Up Your Device

Use the Setup Wizard
The first time you turn your device on, a Welcome screen is displayed. It guides you through the basics of setting up your device.

Follow the prompts to choose a default language, connect to a Wi-Fi® network, set up accounts, choose location services, learn about your device’s features, and more.

Voice Assistant provides voice prompts and descriptions of items on the screen to improve accessibility. To enable or disable Voice Assistant during setup, press the Home key quickly three times.
Google Account

Your new device uses your Google™ Account to fully utilize its Android™ features, including Gmail™ and the Google Play™ store.

When you turn on your device for the first time, set up your existing Google Account or create a new Google Account.

– or –

To create a new Google Account or set up your Google Account on your device at any time, use Accounts settings.

1. From a Home screen, tap Apps > Settings.
2. Tap Cloud and accounts > Accounts.
3. Tap Add account > Google.

Factory Reset Protection

When you sign in to a Google Account on your device, Factory Reset Protection is activated. Factory Reset Protection (FRP) prevents other people from using your device if it is reset to factory settings without your permission. For example, if your device is lost or stolen and a factory data reset is performed, only someone with your Google Account username and password can use the device.

You will not be able to access the device after a factory data reset if you do not have your Google Account username and password. For more information, see “Factory Data Reset” on page 141.

Caution: Before shipping your device back to Samsung or taking it to your nearest Samsung-authorized service center, you should remove your Google Account before resetting the device back to factory settings. For more information, visit samsung.com/us/support/frp.
Enable Factory Reset Protection

Adding a Google Account to your device automatically activates the Factory Reset Protection (FRP) security feature.

Disable Factory Reset Protection

To disable FRP, remove all Google Accounts from the device.

1. From a Home screen, tap Apps > Settings.
2. Tap Cloud and accounts > Accounts > Google.
   - If you have more than one Google Account set up on your device, tap the Google Account you want to remove.

Samsung Account

Create a Samsung account for access to Samsung content and apps on your device. When you turn on your device for the first time, set up your existing Samsung account or create a new Samsung account.

– or –

To create a new Samsung account or set up your Samsung account on your device at any time, use Accounts settings.

1. From a Home screen, tap Apps > Settings.
2. Tap Cloud and accounts > Accounts.
3. Tap Add account > Samsung account.
Add an Email Account

Use the Email app to view and manage all your email accounts in one app.

When you turn on your device for the first time, set up your existing email account or create a new email account.

– or –

To create a new email account or set up your email account on your device at any time, use Accounts settings.

1. From a Home screen, tap Apps > Settings.
2. Tap Cloud and accounts > Accounts.
3. Tap + Add account > Email.

Widgets

Widgets are simple application extensions that run on a Home screen. There are many kinds of widgets, including links to a specific contact, Internet bookmarks, Gmail and email accounts, and many others.

To add a widget to a Home screen:
1. From a Home screen, pinch the screen.
2. Tap Widgets.
3. Touch and hold a widget, drag it to a Home screen, and release it.

To remove a widget:
1. From a Home screen, touch and hold a widget to release it.
2. Drag the widget to Remove and release it.
   • Removing a widget does not delete the widget, it just removes the widget from the Home screen.

Folders

Place folders on a Home screen to organize items.

Create a Folder
You can create an app folder on a Home screen.

1. From a Home screen, touch and hold an app shortcut and drag it on top of another app shortcut until it is highlighted.
2. Release the app shortcut to create the folder.
   • Enter folder name: Enter a name for the folder.
   • Palette: Change the color.
   • Add: Place more apps in the folder. Tap apps to select them, and then tap Add.
3. Tap anywhere outside of the folder to close it.
   • To add more apps, touch and hold an app shortcut and drag it to the folder.
Remove a Folder from a Home Screen

You can remove a folder that you added to a Home screen.

1. Touch and hold the folder until it detaches.
2. Drag the folder to Delete and release it. Confirm when prompted.

Wallpapers

Set visual themes for all system screens and icons on your device. Change the look of the Home and Lock screens with wallpaper. You can display a favorite picture or choose from preloaded wallpapers.

1. From a Home screen, pinch the screen.
2. Tap Wallpapers to see all available wallpaper images.
   - Tap From Gallery for additional wallpapers.
3. Tap an image to choose it, and then choose which screen you want to use it for:
   - Home screen
   - Lock screen
   - Home and lock screens
4. Tap Set as wallpaper.
Screens

Your device comes with multiple Home screens to hold app shortcuts and widgets. You can add, remove, change the order of screens, as well as choose a different main Home screen.

1. From a Home screen, pinch the screen.

2. Use these options to manage screens:

   - **Add a screen**: Swipe to the end of the screens, and then tap Add.

   - **Remove a screen**: Touch and hold a screen, and then drag it to Remove.

   - **Set a screen as the main Home screen**: Tap Main Home screen at the top of a screen. This screen is displayed when you press the Home key.

   - **Change the order of screens**: Touch and hold a screen, and then drag it to a new position.
Navigation

Predictive Text
Predictive text suggests words that match your text entries, and can automatically complete common words. Predictive text can learn your personal writing style from your contacts, messages, email, and social networking sites — improving the accuracy of predicting text entries.

Configure the Samsung Keyboard
To customize the Samsung keyboard:

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Language and input > Virtual keyboard > Samsung keyboard for options.

- **Languages and types**: Set the keyboard type and language.
  - **Manage input languages**: Choose which languages are available on the keyboard.
- **Smart typing**: Use predictive text and correct common typing mistakes to improve input.
  - **Predictive text**: Predictive text suggests words that match your text entries, and can automatically complete common words. Predictive text can learn your personal writing style from your contacts, messages, Gmail, and social networking sites — improving its accuracy of predicting your text entries.
  - **Additional keyboard settings** provide assistance with capitalization, punctuation, and much more.

- **Customization**: Use alternative characters, text shortcuts, change the keyboard size, or use a high contrast keyboard.

- **Other settings**: Reset keyboard settings, clear personalized data, and view information about the Samsung keyboard.
Use Google Voice Typing
Instead of typing, enter text by speaking.

To enable Google voice typing:
1. Tap Voice input on the Samsung keyboard.
   - You may need to touch and hold Options (left of the Space bar) to find it.
2. Speak your text.

Configure Google Voice Typing
To customize Google voice typing:
1. From a Home screen, tap Apps > Settings.
2. Tap General management > Language and input > Virtual keyboard > Google voice typing for options.
   - Languages: Select languages for Google voice typing.
   - “Ok Google” detection: Launch a Google search whenever you say “OK Google”.
   - Hands-free: Allow requests with the device locked.
   - Speech output: Select options for spoken feedback.
   - Offline speech recognition: Download and install speech recognition engines, allowing you to use voice input while not connected to the network.
• **Block offensive words**: Hide search results that contain offensive words.

• **Bluetooth headset**: Use audio input from a Bluetooth® headset (not included) if one is connected.
Multi Window

Multitask by using multiple applications at the same time.

Window Controls

Tap — **Window controls** in the middle of the window border for options.

- **Switch windows**: Switch locations between Multi window apps.
- **Open in pop-up view**: Open the selected app in a pop-up window.
- **Close app**: Close the selected app.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Enable Multi Window

1. From a Home screen, tap Apps > Settings.
2. Tap Advanced features > Multi window.

- **Split screen view action**: Touch and hold the Recent apps key to change the current app from full screen view to split screen view. While in split screen view, touch and hold the Recent apps key to close the app on the bottom.

- **Pop-up view gesture**: When an app is open on the screen, adjust the size of the app by swiping down diagonally from either corner of the screen.

Use Multi Window

Apps that support Multi window display together on a split screen. You can switch between the apps, adjust the size of their display on the screen, and copy information from one app to the other.

1. Tap Recent apps.

   - Recently used apps that support Multi window have a Multi window icon in their title bar.

2. Tap Multi window in the title bar to launch an application in split screen view.

   - Other recently used apps that support Multi window display below the launched app.

3. Tap an app to add it to the split screen view.
S Pen

The S Pen is a stylus that assists you in performing different functions.

The S Pen comes with your device. It can be attached to the back of the device magnetically.

Air View

Hover the S Pen over the screen to preview content or view information about an item on the screen. For example:

- Hover over an email in a list to preview the message before opening it.
- Hover over a photo album to preview the contents or see a picture enlarged.
- Hover over the timeline during video playback to preview and navigate to specific scenes.
- Hover over an icon or screen button to view the item’s name or description.

Note: The preview function is only available when the S Pen’s onscreen pointer is a solid color.
Direct Pen Input

When filling out a form field in an app (like the Name or Number fields in the Contacts app), you can open a Handwriting window that allows you to handwrite an entry with the S Pen rather than type.

To use the Handwriting window:

1. Hover the S Pen over a text field until Handwriting displays.
2. Tap Handwriting. The Handwriting window displays.
3. Use the space provided in the window to write an entry by hand using the S Pen. While writing, your entries are converted into text.
   - To edit the converted text, use the Space, Delete, and Enter icons.
   - To change the position of the cursor, drag the pointer below the cursor to the desired position for editing.
   - To draw images, tap Drawing mode, and tap Done when finished.

Configure S Pen Settings

To configure S Pen settings:

► From a Home screen, tap Apps > Settings > Advanced features > S Pen.

For more information, see “S Pen Settings” on page 166.
Replace the S Pen Tip

You can replace the tip of the S Pen.

To replace the tip:

1. Use tweezers to pull out the S Pen tip.

2. Insert the new pen tip in the end of the S Pen and press until it clicks in place.

► Tap Air command > View all notes.

Smart Select

The Smart select feature provides a capture tool to select content on a screen. You can then add it to your Gallery app or share it with your contacts.
To launch the Smart select tool:

1. Tap 📝 Air command > 📰 Smart select.
2. Tap a shape at the top of the screen, and then drag a box with the S Pen to select content. The following options appear:
   - **Auto select**: Allow Smart select to automatically select content to extract.
   - **Extract text**: Identify and extract text from the selected content.
   - **Draw**: Draw on the captured screen using the S Pen.
   - **Share**: Choose a sharing method to share your content.
   - **Save**: Save the content to the Gallery app.

**Screen Write**

Screen write allows you to capture a screen shot and then write notes on the screen shot.

To use Screen Write:

1. Tap 📝 Air command > 🖼️ Screen write.
2. The current screen is captured, and a pen tool appears. The following editing tools are provided:
   - **Pen**: Draw on the screen shot. Press the Pen icon a second time to change the pen tip, size, color, and to save presets.
   - **Eraser**: Erase the writing or drawings on the screen shot. Tap the Eraser icon a second time to change the size of the eraser area and to see the Erase all option.
   - **Undo**: Undo the last action.
   - **Redo**: Redo the last action that was undone.
   - **Crop**: Crop the captured screen.
   - **Share**: Choose a sharing method to share your content.
   - **Save**: Save the content to the Gallery app.
3. Tap **Save** when finished.
Translate

Translate words by hovering over them with the S Pen.

To access Translate:
1. Tap 📄 Air command > 📖 Translate.
2. Tap the Source and Target languages to change them to the desired languages.
3. Hover the S Pen over a word.
   • Tap 🎤 Sound to hear the word pronounced in the Source language.
4. Tap ✗ Close to close Translate.

Add Shortcuts

You can add shortcuts to apps and functions to the Air command menu.

To use Add shortcuts:
1. Tap 📄 Air command > ☀ Add shortcuts.
2. Swipe the screen up or down, and tap the apps or functions you would like to add to the Air command menu.
   • To delete an app shortcut tap ☐ Remove.
3. Tap ← Back to save your selection.
Air Command Settings

Configure settings for Air command.

To access Settings:

► Tap 📱 Air command > ☰️ Settings. The following options are available:

- **Shortcuts**: Choose and arrange the shortcuts that appear on the Air command menu.

- **Floating icon**: Choose to enable the Air command menu to appear as a floating icon that can be moved around the screen.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Take Pictures

Take pictures with your device’s front or rear camera.

Note: If you have an SD card installed, pictures and videos are stored to the SD card. If no card is installed, pictures and videos are saved to your tablet’s memory.

1. From a Home screen, tap Apps > Camera.
2. Using the display screen as a viewfinder, compose your shot by aiming the camera at the subject. While composing your picture, use the available options or these gestures:
   - To focus the shot, tap the screen. When you tap the screen, a brightness scale is displayed. Slide the light bulb up or down to adjust the brightness.
   - To add an effects filter, swipe to the left and tap a preview filter to apply it to the screen.
   - To add a shooting mode, swipe to the right and select a mode.
   - To quickly switch between the front and rear cameras, swipe the screen up or down.
   - To add a camera setting, tap a Quick settings icon or Settings.
3. Tap Take a picture to take the picture.
Record Videos
Record high-quality videos using your tablet’s video camera.

1. From a Home screen, tap Apps > Camera.
2. Aim the camera at your subject, and then tap Record.
3. The following actions are available:
   - Tap Capture to take a picture while recording.
   - Tap Pause to pause recording.
   - Tap Resume to resume recording.
   - Tap Stop to stop recording.

Configure Shooting Mode
Several visual effects are available. Some modes are not available when taking self-portraits.

1. From a Home screen, tap Apps > Camera.
2. Swipe to the right for the Mode options. Each section indicates which camera (front or rear) the modes are available for.

Rear camera
- **Auto**: Allow the camera to evaluate the surroundings and determine the ideal mode for the picture.
- **Pro**: Manually adjust the ISO sensitivity, exposure value, white balance, and color tone while taking pictures.
- **Panorama**: Create a linear image by taking pictures in either a horizontal or vertical direction.
• **Hyperlapse**: Create your own time lapse video by recording at various frame rates. The frame rate is automatically adjusted depending on the scene being recorded and the movement of the device.

• **HDR (Rich tone)**: Enables the light sensitivity and color depth features of the device to produce a brighter and richer picture.

• **Food**: Take pictures that emphasize the vivid colors of food.

**Front camera**

• **Selfie**: Take selfie shots and apply various effects, such as an airbrushed effect.

• **Wide selfie**: Take wide-angle selfie shots to fit more people into your pictures.

**Common**

• **Download**: Download additional shooting modes from the Galaxy Apps store.

• **More options**: See more options for the camera modes.

• **Continuous shot**: Touch and hold the Camera button to take pictures continuously.

• **Virtual shot**: Create multi-directional views of objects.
Share Pictures and Videos

The Gallery application lets you share pictures and videos on your social networks and messaging apps. You can also send them to another tablet, phone, or your computer using Bluetooth.

For more information, see “Share Pictures and Videos” on page 74.

Wi-Fi

Wi-Fi is a term used for certain types of Wireless Local Area Networks (WLAN). Wi-Fi communication requires access to a wireless Access Point (AP).

Connect to a Wi-Fi Network

To scan for a Wi-Fi network and connect to it:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Wi-Fi, and then tap On/Off to turn on Wi-Fi.
   • When Wi-Fi is turned on, your device automatically scans for available networks and displays them.
3. Tap the network you want to connect to.
   • When you select an open network, you are automatically connected to the network. Otherwise, enter a password to connect.

Manually Connect to a Wi-Fi Network

You can connect your device to a Wi-Fi network manually.
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Wi-Fi, and then tap On/Off to turn on Wi-Fi.
3. Swipe to the bottom of the screen and tap Add network.
4. Enter information about the Wi-Fi network:
   • **Network name**: Enter the name of the Wi-Fi network.
   • **Security**: Select a security option and enter your password.
   • **Auto reconnect**: Connect to this network automatically whenever available.
   • **Show advanced options**: Add advanced options such as IP settings and Proxy settings.
5. Tap **Connect** to store the new information and connect to your target wireless Access Point.

**Wi-Fi Options**

The Wi-Fi settings menu allows you to set up many of your device’s advanced Wi-Fi services.

1. From a Home screen, tap 📱 **Apps ▶ Settings**.

2. Tap **Connections ▶ Wi-Fi**, and then tap **On/Off** to turn on Wi-Fi.

3. Tap **Advanced** for options:
   - **Smart network switch**: Connect automatically to a mobile network connection when the Wi-Fi connection is unstable.
   - **Network notification**: Receive notifications when open networks in range are detected.
   - **Manage networks**: Manage your saved Wi-Fi networks.
   - **WPS push button**: Set up a connection to a WPS (Wi-Fi Protected Setup) router or other equipment.
   - **WPS PIN entry**: View the PIN used by your device to set up a PIN-secured connection to a Wi-Fi router or other equipment (not configurable).
   - **Keep Wi-Fi on during sleep**: Specify when to disconnect from Wi-Fi.
   - **Install network certificates**: Install authentication certificates.
   - **Wi-Fi control history**: View apps that have turned Wi-Fi on or off most recently.
   - **MAC address**: View your device’s MAC address, which is required when connecting to some secured networks (not configurable).
   - **IP address**: View your device’s IP address (not configurable).
Wi-Fi Direct
Wi-Fi Direct allows direct device-to-device connections using Wi-Fi, without having to connect to a Wi-Fi network.

Connect to a Device with Wi-Fi Direct
Use Wi-Fi Direct to connect directly to other Wi-Fi Direct devices.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Wi-Fi, and then tap On/Off to turn on Wi-Fi.
   • Wi-Fi must be on to configure settings.
3. Tap Wi-Fi Direct. Your device automatically scans for nearby Wi-Fi Direct devices.
4. Tap a device, and then follow the prompts to complete the connection.

Send and Receive Data with Wi-Fi Direct
Share data with another device using Wi-Fi Direct.

1. Connect your phone to the device using Wi-Fi Direct.
2. From an app, type Share or More options > Share.
   • Sharing options may vary.
3. Tap Wi-Fi Direct and follow the prompts.

Disconnect from Wi-Fi Direct
Disconnect your phone from a Wi-Fi Direct device.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Wi-Fi > Wi-Fi Direct.
3. Tap a device to disconnect it.
Bluetooth

Bluetooth is a short-range communications technology that connects your device wirelessly to a number of Bluetooth devices, such as headsets and hands-free car Bluetooth systems, and Bluetooth-enabled computers, printers, and wireless devices.

The Bluetooth communication range is approximately 30 feet.

Pair with a Bluetooth Device

The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device.

Pairing between two Bluetooth devices is a one-time process. Once a pairing is created, the devices continue to recognize their partnership and exchange information without having to re-enter a passcode.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Bluetooth, and then tap On/Off to turn on Bluetooth.
   - Make sure that the target device is discoverable so that your device can find it. Refer to the instructions that came with the device to find out how to set it to discoverable mode.
   - When Bluetooth is first turned on, it scans for nearby Bluetooth devices and displays them.
   - To manually perform a new scan, tap Scan.
3. Tap the name of the target device when you see it displayed in the Bluetooth devices section.
   - Your device automatically tries to pair with the target device. If automatic pairing fails, enter the passcode supplied with the target device.
Rename a Paired Device
Once you have paired your device to another device, you can rename the paired device to make it easier to recognize.

1. From a Home screen, tap Apps > Settings.

2. Tap Connections > Bluetooth, and then tap On/Off to turn on Bluetooth.

3. Tap Settings next to the previously paired device, and then tap Rename.

4. Enter a new name, and tap Rename.

Share Data with Bluetooth
Use Bluetooth to transfer information between your phone and another Bluetooth-enabled device.

To send data to another device using Bluetooth:
1. From an app, type Share or More options > Share.

2. Tap Bluetooth and follow the prompts.

To receive data from another device using Bluetooth:
1. When another device attempts to send a file to your phone using Bluetooth, you will see a request to accept the file.

2. Tap Accept.

3. To open the file, drag down the Notification panel and tap File received.

Connect with a Bluetooth Device
Listen to music using a Bluetooth stereo headset, or have hands-free conversations using a compatible Bluetooth headset or car kit.

1. From a Home screen, tap Apps > Settings.

2. Tap Connections > Bluetooth, and then tap On/Off to turn on Bluetooth.

3. Tap a device from the “Paired devices” list.
Disconnect from a Bluetooth Device

Disconnect a Bluetooth device from your phone.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Bluetooth, and then tap On/Off to turn off Bluetooth.

Unpair from a Bluetooth Device

When you unpair from a Bluetooth device, the two devices no longer recognize each other. To connect again, you have to pair the devices.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Bluetooth, and then tap On/Off to turn on Bluetooth.
3. Tap Settings next to the paired device, and then tap Unpair to delete the paired device.

Tablet Visibility

You can make your device visible to allow other devices to find it and share content.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Tablet visibility, and then tap On/Off to turn on visibility.

Data Usage

Monitor how your data is being used, and set limits and restrictions to conserve it.

Your service provider may account for data usage differently.
**Turn Data Saver On or Off**

Data saver prevents some apps from sending or receiving data in the background, as well as reduce the frequency of data use.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage > Data saver.
3. Tap On/Off to turn Data saver on or off.
4. Tap Allow app while Data saver on, and then tap On/Off next to each app that you want to permit to have unrestricted data usage.

**Turn Mobile Data On or Off**

Enable or disable mobile data use on your phone.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage > Mobile data to turn mobile data on or off.

**Set or Remove Limits to Mobile Data Usage**

Limit mobile data use on your phone.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage > Billing cycle and data warning.
3. Tap On/Off next to Data limit to enable the feature.
4. Tap Data limit to set the data usage limit.
Create an Alert for Mobile Data Usage

Receive alerts when mobile data use reaches a warning amount you set.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage > Billing cycle and data warning.
3. Tap Data warning to set the data usage warning amount.

Check Mobile Data Usage by Apps

Monitor your apps’ mobile data usage.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage > Mobile Data Usage.
3. Tap an app to view data usage details.

Additional Data Usage Options

Configure more options for data usage.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Data usage. The following options are available:
   - **Bill cycle and data warning**: Configure your billing cycle.
   - **Wi-Fi data usage**: Monitor your apps’ Wi-Fi data usage.
   - **Restrict networks**: Select networks to prevent apps that are running in the background from using them.
**Airplane Mode**

Airplane mode disconnects your device from all networks and turns off connectivity features, such as phone calls and Wi-Fi.

While in Airplane mode, you can use other features such as playing music, watching videos, and other offline applications.

To enable or disable Airplane mode:

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Airplane mode.
3. Tap On/Off to enable or disable the option.

**Mobile Hotspot**

Activate Mobile hotspot to allow other devices to use your device’s Internet connection.

**Note:** You must have a tethering plan on your service account in order to use Mobile hotspot or Tethering.

**Warning:** Mobile hotspot consumes battery power and uses data service.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Mobile hotspot and tethering > Mobile hotspot.
3. Tap On/Off to turn Mobile hotspot on or off.
Connect a Device to Your Mobile Hotspot

Use the other device’s Wi-Fi control to connect to Mobile hotspot.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Mobile hotspot and tethering > Mobile hotspot.
3. Tap On/Off to turn on Mobile hotspot.
4. Activate Wi-Fi on the target device.
5. Scan for Wi-Fi hotspots and select your device’s Mobile hotspot.
6. Enter your device’s Mobile hotspot password on the target device.

Change the Mobile Hotspot Password

You can change your Mobile hotspot password.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Mobile hotspot and tethering > Mobile hotspot.
3. Tap the password and enter a new password.
4. Tap Save.

Allowed Devices List

Control whether devices connect to your Mobile hotspot with the Allowed devices list. After you add devices to the list, they can scan for your device and connect using your device’s Mobile hotspot name and password.
Note: Using your device as a Mobile hotspot consumes battery power and uses data service. While Mobile hotspot is active, your device’s applications use the Mobile hotspot data service. Roaming while using your device as a Mobile hotspot incurs extra data charges.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Mobile hotspot and tethering > Mobile hotspot.
3. Tap More options > Allowed devices, and then tap Add to enter the other device’s Device name and MAC address.
4. Tap Add to add the device.
   - Tap Allowed devices only to enable Allowed devices only.

Configure Mobile Hotspot Settings

Manage your Mobile hotspot security and connecting settings.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > Mobile hotspot and tethering > Mobile hotspot.
3. Tap More options > Configure mobile hotspot for the following settings:
   - Network name: View and change the name of your Mobile hotspot.
   - Broadcast network name (SSID): Make your device visible to others.
   - Security: Choose the security level for your Mobile hotspot.
   - Password: If you choose a security level that uses a password, enter the password. A default password is displayed on the Mobile hotspot screen.
• **Show advanced options**: Access advanced options, including Broadcast channel, and to specify the channel your device uses for Mobile hotspot.

## Tethering

You can use Bluetooth or USB tethering to share your device’s Internet connection with a computer.

1. From a Home screen, tap 📱 Apps > ⚙️ Settings.
2. Tap Connections > Mobile hotspot and tethering.
3. Tap an option:
   - Tap **Bluetooth tethering** to share your device’s Internet connection via Bluetooth.
   - Connect the computer to the device using the USB cable, and then tap **USB tethering** to turn on tethering.

## Location

Some apps, such as Google Maps, may require one or more location services be turned on for full functionality.

### Locating Method

Before using any features that require location assistance, you must enable your device’s location services.

1. From a Home screen, tap 📱 Apps > ⚙️ Settings.
2. Tap Connections > Location.
3. Tap On/Off to turn on Location services.
4. Tap **Locating method** to select how your location is determined:
   - **High accuracy**: Uses GPS, Wi-Fi, and mobile networks.
   - **Battery saving**: Uses Wi-Fi and mobile networks (no GPS).
   - **Tablet only**: Uses GPS only.

5. Tap **Improve accuracy** to use other connections for determining your location:
   - **Wi-Fi scanning**: Allow apps and services to scan for Wi-Fi networks automatically, even when Wi-Fi is turned off.
   - **Bluetooth scanning**: Allow apps to scan for and connect to nearby devices automatically through Bluetooth, even when Bluetooth is turned off.

---

### Recent Location Requests

Apps that have requested your location are listed under **Recent location requests**.

1. From a Home screen, tap **Apps > Settings**.
2. Tap **Connections > Location**.
3. Tap **On/Off** to turn on Location services.
4. Tap an entry under **Recent location requests** to view the app’s settings.

---

### Location Services

Google Location History™ stores and uses your device’s most recent location data. Google apps, such as Google Maps, can use this data to improve your search results based on places that you have visited.

1. From a Home screen, tap **Apps > Settings**.
2. Tap **Connections > Location**.
3. Tap **On/Off** to turn on Location services.

4. Tap **Google Location History** and sign in to your Google Account for more options.

**Nearby Device Scanning**

Scan for nearby devices to connect to and set them up easily. You receive a notification when there are available devices to connect to. This function uses Bluetooth Low Energy scanning even if Bluetooth is turned off on your device.

To enable nearby device scanning:
1. From a Home screen, tap **Apps > Settings**.
2. Tap **Connections > More connection settings > Nearby device scanning**.
3. Tap **On/Off** to enable the feature.

**Printing**

Print images and documents to Samsung printers and other compatible printers (not included).

1. From a Home screen, tap **Apps > Settings**.
2. Tap **Connections > More connection settings > Printing**.
3. Tap **Download plug-in**, and follow the prompts to install print service drivers.
Download Booster

Download booster improves download speed by using both Wi-Fi and 4G LTE networks at the same time when downloading files over 30 MB in size.

Note: Download booster uses mobile data services.

To turn on Download booster:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings > Download booster.
3. Tap On/Off to enable Download booster.

Virtual Private Networks (VPN)

Set Up and Manage a VPN

Use the VPN settings menu to add, edit, or delete a VPN connection to your device.

To add a VPN:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings > VPN.
3. Tap Add VPN and follow the prompts to set up your VPN.
To edit or delete a VPN:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings > VPN.
3. Tap Settings next to the VPN that you want to edit or delete.
4. Edit the VPN and tap Save.
   – or –
   Tap Delete to delete the VPN.

Connect to or Disconnect from Your VPN

Once you have set up a VPN connection, connecting to and disconnecting from the VPN is easy.

To connect to a VPN:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings > VPN.
3. Tap the VPN, enter your log in information, and tap Connect.

To disconnect from a VPN:
1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings > VPN.
3. Tap the VPN, and then tap Disconnect.
Manage your Ethernet connections.

1. From a Home screen, tap Apps > Settings.
2. Tap Connections > More connection settings.
3. Tap Ethernet and follow the prompts to connect to an Ethernet network.
Sounds and Vibration

Configure the sounds and vibrations used to indicate notifications, screen touches, and other interactions.

2. Tap Device maintenance > Storage.
3. Tap Clean now and follow the prompts.

Memory Card (SD Card)

Once an optional memory card (not included) has been installed in your device, the card memory is displayed in the Storage setting.

For more information, see “Install the SIM Card and a Memory Card” on page 5.
Mount a Memory Card
When you install an optional memory card, it is automatically mounted (connected to the device) and prepared for use. However, should you unmount the card without removing it from the device, you need to mount it before it can be accessed.

1. From a Home screen, tap Apps > Settings.
2. Tap Device maintenance > Storage.
4. Under Portable storage, tap your SD card, and then tap Mount.

Remove a Memory Card

Warning: To prevent damage to information stored on the memory card, unmount the card before removing it from the device.

1. From a Home screen, tap Apps > Settings.
2. Tap Device maintenance > Storage.
4. Under Portable storage, tap your SD card, and then tap Unmount.
5. Remove your memory card from the device.
Format a Memory Card

**Warning:** When formatting an SD card, you should back up your music and photo files that are stored on the card because formatting the SD card deletes all the stored data.

1. From a Home screen, tap 📱 Apps > 🔍 Settings.
2. Tap Device maintenance > Storage.
4. Under Portable storage, tap your SD card, tap Format, and then follow the prompts.

Memory

Check the amount of available memory. You can close background apps and reduce the amount of memory you are using to speed up your device.

1. From a Home screen, tap 📱 Apps > 🔍 Settings.
2. Tap Device maintenance > Memory.
   - The used and available memory are shown.
3. To free up as much memory as possible, tap Clean now and follow the prompts.
   - The selected apps and services in the list will be closed.
Language and Input
Configure your device’s language and input settings.

Change the Device Language
You can add languages to your list and organize them according to preference. If an app does not support your default language then it will move to the next supported language in your list.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Language and input > Language.
3. Tap Add language, and select a language from the list.
   - To change the default language, or remove a language from your list, tap Edit.

Manage Virtual Keyboards
Enable or disable virtual keyboards.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Language and input > Virtual keyboard > Manage keyboards.
3. Tap each keyboard to enable or disable.

Configure your Text-to-Speech (TTS) options. TTS is used for various accessibility features, such as Voice Assistant.

1. From a Home screen, tap **Apps > Settings**.
2. Tap **General management > Language and input > Text-to-speech** for options:
   - **Preferred TTS engine**: Choose either the Samsung or Google Text-to-speech engine. Tap **Settings** next to each TTS engine for options.
   - **Speech rate**: Set the speed at which the text is spoken.
   - **Pitch**: Set the pitch at which the text is spoken.
   - **Reset speech rate**: Reset the speed at which the text is spoken to the default setting.
• **Reset pitch**: Reset the pitch at which the text is spoken to the default setting.

• **Listen to an example**: Play a short demonstration of speech synthesis.

• **Default language status**: Display the default language in use.

**Pointer Speed**

Configure pointer speed for an optional mouse or trackpad (not included).

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Language and input.
3. Under **Pointer speed**, drag the slider to the right to go faster or to the left to go slower.

**Date and Time**

By default, your device receives date and time information from the wireless network. When you are outside network coverage, you may want to set date and time information manually using the date and time settings.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Date and time.

The following options are available:

• **Automatic date and time**: Receive date and time updates from the wireless network. When Automatic date and time is disabled, the following options are available:
  - **Set date**: Enter the current date.
  - **Set time**: Enter the current time.
- **Select time zone**: Choose your local time zone.

- **Use 24-hour format**: Set the format for displaying time.

### Report Diagnostic Information

This feature sends diagnostic information about your device when you are having technical problems.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Report diagnostic information to enable or disable this feature.

### Reset

Reset device and network settings. You can also reset your device to its factory defaults.

### Reset Settings

You can reset your device to its factory default settings, which resets everything except the security, language, and account settings. Personal data is not affected.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Reset > Reset settings.
3. Tap Reset settings, and confirm when prompted.
Reset Network Settings
You can reset Wi-Fi, Mobile data, and Bluetooth settings with Reset network settings.

1. From a Home screen, tap Apps > Settings.
2. Tap General management > Reset > Reset network settings.
3. Tap Reset settings, and confirm when prompted.

Factory Data Reset
You can reset your device to factory defaults, erasing all data from your device.

This action permanently erases ALL data from the device, including Google or other account settings, system and application data and settings, downloaded applications, as well as your music, photos, videos, and other files. Any data stored on an external SD card is not affected.

Note: When you sign in to a Google Account on your device, Factory Reset Protection is activated. This protects your device in the event it is lost or stolen. For more information, see “Factory Reset Protection” on page 10.

If you reset your device to factory default settings with the Factory Reset Protection (FRP) feature turned on, you must enter the user name and password for a registered Google Account to regain access to the device. You will not be able to access the device without the correct credentials.

Warning: If you reset your Google Account password, it can take 24 hours for the password reset to sync with all devices registered to the account.

Before resetting your device:
1. Verify that the information you want to keep has transferred to your storage area.
2. Log in to your Google Account and confirm your user name and password.
To reset your device:
1. From a Home screen, tap Apps > Settings.
2. Tap General management > Reset > Factory data reset.
3. Tap Reset and follow the prompts to perform the reset.
4. When the device restarts, follow the prompts to set up your device.

Auto Restart
Optimize your device by restarting it automatically at set times. The device only restarts if it is not in use and battery power is more than 30 percent.

Note: Any unsaved data is lost when the device restarts.

To enable Auto restart:
1. From a Home screen, tap Apps > Settings.
2. Tap General management > Reset > Auto restart.
3. Tap On/Off to activate Auto restart, and then set the following parameters:
   - Time: Set the time of day to restart your device.
   - Day: Select the day of the week to automatically restart your device.
Software Update

Check for and install available software updates for your device.

1. From a Home screen, tap Apps > Settings.

2. Tap Software update for the following options:
   - Download updates manually: Check for and install available software updates.
   - Scheduled software updates: Set a time to automatically check for and install available software updates.
Lock Screen and Security

Secure your device and protect your data with Lock Screen and Security settings.
Set a Screen Lock

It is recommended that you secure your device using a Screen lock. Options vary based on the screen lock type.

1. From a Home screen, tap Apps > Settings.

2. Tap Lock screen and security > Screen lock type to select a screen lock and level of security:
   - **Swipe**: Swipe the screen to unlock it. This option provides no security.
   - **Pattern**: Create a pattern that you draw on the screen to unlock your device. This option provides medium security.
   - **PIN**: Select a PIN to use for unlocking the screen. This option provides medium to high security.
   - **Password**: Create a password for unlocking the screen. This option provides high security.
   - **None**: Do not lock the screen.
   - **Fingerprints**: Use fingerprint recognition to unlock the screen. This option provides medium to high security.

3. Select your notification preferences, if you choose a secured lock screen option:
   - Show content
   - Hide content
   - Do not show notifications

4. Tap Set up to set up and use your fingerprints to unlock the device in addition to a PIN, pattern, or password. Tap Later to skip fingerprints setup.

5. Choose a screen lock option:
   - **Info and app shortcuts**: Display a dual clock, owner information, or app shortcuts on the Lock screen.
   - **Notifications**: Show notifications on the Lock screen.
Settings

- Secure lock settings: Set your secure lock functions such as Secured lock time and Smart lock. This option is not available with Swipe.

Fingerprints

Use fingerprint recognition as an alternative to entering passwords in certain apps. You can also use your fingerprint to verify your identity when logging in to your Samsung account.

Note: Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing even small areas of two different fingerprints is very low. But, in rare cases, the sensor may recognize a fingerprint that is similar to a registered fingerprint.

Register a Fingerprint

To use your fingerprint to unlock your device, you must set a pattern, PIN, or password. You can register up to four fingerprints.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Fingerprints.
   - If no fingerprints are registered, you are prompted to choose a secure screen lock and scan your fingerprint. Follow the prompts to complete setup.
   - To add a fingerprint, tap Add fingerprint and follow the prompts to register a fingerprint.
   - To rename a fingerprint, tap the fingerprint, enter a new name, and then tap Rename.
   - To delete a fingerprint, tap edit, tap the fingerprint to remove, and then tap Remove. Confirm when prompted.
Fingerprint Verification
Fingerprint verification can be used for other accounts accessed from your device.

1. From a Home screen, tap Apps > Settings.

2. Tap Lock screen and security > Fingerprints for the following options:
   - **Samsung Pass**: Access your online accounts using your fingerprint.
   - **Samsung account**: Verify your identity using your fingerprint when logging in to your Samsung account.
   - **Fingerprint unlock**: Tap On/Off to enable or disable fingerprint recognition to unlock the screen.

Samsung Pass
Use Samsung Pass to access your favorite services with biometric data. You must sign in to your Samsung account to use Samsung Pass.

1. From a Home screen, tap Apps > Settings.

2. Tap Lock screen and security > Samsung Pass.

   - Sign in to your Samsung account to use Samsung Pass. Tap Sign in and follow the prompts.

3. Follow the prompts to use Samsung Pass.
Find My Mobile

Protect your device from loss or theft allowing your device to be locked, tracked, and for your data to be deleted remotely. You must sign up for a Samsung account and enable Google location service to use Find My Mobile.

► To access your device remotely, visit findmymobile.samsung.com.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Find My Mobile.
3. Enter your Samsung account password or, if you are not logged in to your Samsung account, tap Add account and follow the prompts. The following options are available:
   • Remote controls: Activate or deactivate Remote controls, which allows you to access your device remotely.
   • Google location service: Activate or deactivate Google location service. This service must be on in order to find your device.
   • Send last location: Allow your phone to send its last location to the Find My Mobile server when the battery falls below a certain level.

Unknown Sources

Enable installation of non-Google Play applications.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Unknown sources to enable this option.

Warning: Enabling installation of third-party applications can cause your device and personal data to be more vulnerable to attacks by unknown sources.
Secure Folder

Lock your private content and apps to enhance security. You must sign in to your Samsung account in order to use Secure Folder. You must also set a secure lock for your device.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Secure Folder and follow the prompts to secure content on your device.

Secure Startup

Protect your device by requiring a numeric PIN, password, or pattern to be entered before it starts up.

**Note:** You must have a secured screen lock for this option to be available.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Secure startup and select an option.

Encrypt SD Card

Require a numeric PIN or password to decrypt your optional memory card (not included) when you first access it after powering on your device.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Encrypt SD card.
3. Tap Encrypt SD card and follow the prompts to encrypt all data on your memory card.

View Passwords

Display password characters briefly as you type them.

1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Other security settings > Make passwords visible to turn the feature on.

Manage your device administrators and application installation privileges.
1. From a Home screen, tap Apps > Settings.
2. Tap Lock screen and security > Other security settings > Device administrators.
   - Tap Android Device Manager to allow it to lock or erase a lost device.
   - Tap Secure Folder to allow it to perform the operations listed.
Credential Storage

Manage your security certificates. If a certificate authority (CA) certificate gets compromised or for some other reason you do not trust it, you can disable or remove it.

1. From a Home screen, tap Apps > Settings.

2. Tap Lock screen and security > Other security settings for the following Credential storage options:

   • **Storage type**: Select a storage location for credential contents.
   
   • **View security certificates**: Display certificates in your device’s ROM and other certificates you have installed.
   
   • **User certificates**: View user certificates.

   • **Install from device storage**: Install a new certificate from storage.

   • **Clear credentials**: Erase the credential contents from the device and reset the password.

Advanced Security Settings

Use these options to configure advanced security settings.

1. From a Home screen, tap Apps > Settings.

2. Tap Lock screen and security > Other security settings for the following advanced options:

   • **Trust agents**: Perform selected actions when trusted devices are connected.

   - To view Trust agents, set up a secured screen lock (Password, PIN, or Pattern). For more information, see “Set a Screen Lock” on page 145.
• **Pin windows**: Pin an app on your device screen, preventing access to other features of your device.

• **Usage data access**: View the applications that can access your device’s usage history.

• **Notification access**: View the applications that can access notifications you receive on your device.

• **Do not disturb permission**: View which apps have permission to change the Do not disturb settings.
Accounts

Set up and manage accounts, including your Google Account, Samsung account, email, and social networking accounts.
Samsung Cloud

Keep your data safe by backing up and restoring your device. You can also sync your data from multiple devices.

1. From a Home screen, tap Apps > Settings.
2. Tap Cloud and accounts > Samsung cloud.
   - If a Samsung account has not been added, tap Add account and follow the prompts.
3. Once a Samsung account is configured, the following options are available:

3. Tap the account and then tap More options > Remove account.

Users

Share this tablet with multiple people by creating User accounts.

Users have their own space, which they can customize with their own apps, wallpaper, and settings. Users can also adjust tablet settings like Wi-Fi, which affects everyone.

Restricted profiles allow only limited access to apps and content.
Set Up User Profiles

Set up user profiles and then select one when unlocking the device to use personalized settings.

1. From a Home screen, tap Apps > Settings.

2. Tap Cloud and accounts > Users.

3. Tap Add user or profile and follow the instructions to set up a new user or profile.

Delete a User or Profile

To delete a user or profile:

1. From a Home screen, tap Apps > Settings.

2. Tap Cloud and accounts > Users.

3. Tap Delete user next to a User profile.

Note: Only the device owner can delete other users or profiles. Deleting a user’s profile removes the user account from the device entirely. This includes the user’s Google Account, Samsung account, and any other local accounts associated with the user.

Switch User Profiles

To access the device with a user profile:

► From a Lock screen, tap Manage users for the user or profile.

Change User Account Nicknames and Photo IDs

The photo and name each user uses in their personal Contact entry (listed under My profile at the top of their Contacts list) is used as their User ID and name.

To change their ID photo and name, each user can edit their personal Contact entry. For more information, see “Edit a Contact” on page 62.

Disclaimer of Warranties; Exclusion of Liability
The information below explains that a user accepts this Product as sold, including the hardware and software components as created and packaged for sale. If the user changes these parameters through a unique modification, Samsung will not be held responsible for damages or issues that result from these end-user changes.

Except as set forth in the Standard Limited Warranty that accompanies the Product, the purchaser takes the product “as is”, and Samsung makes no express or implied warranty of any kind whatsoever with respect to the product, including but not limited to the:

- merchantability of the product or its fitness for any particular purpose or use;
- design, condition or quality of the product;
- performance of the product;
- workmanship of the product or the components contained therein; or
- compliance of the product with the requirements of any law, rule, specification or contract pertaining thereto.
Nothing contained in the User Manual shall be construed to create an express or implied warranty of any kind whatsoever with respect to the Product. In addition, Samsung shall not be liable for any damages of any kind resulting from the purchase or use of the product or arising from the breach of the express warranty, including incidental, special or consequential damages, or loss of anticipated profits or benefits.

Modification of Software
Samsung is not liable for performance issues or incompatibilities caused by your editing of registry settings, or your modification of Operating System (OS) software.

Using custom OS software may cause your device and applications to work improperly. Your carrier may not permit users to download certain software, such as custom OS.

Samsung Knox
Samsung Knox is Samsung’s security platform and is a mark for a Samsung device tested for security with enterprise use in mind. Additional licensing fee may be required. For more information about Knox, please refer to: samsung.com/us/knox

Restricting Children’s Access to Your Mobile Device
Your device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the device, or make calls that increase your device bill. Keep the device and all its parts and accessories out of the reach of small children.
Screen images are simulated. Appearance of device may vary.

The actual available capacity of the internal memory is less than the specified capacity because the operating system and default applications occupy part of the memory. The available capacity may change when you upgrade the device.

Some multimedia (audio/video) files contain Digital Rights Management (DRM) technology to verify you have the right to use the files. Preloaded apps on your device may not be compatible with DRM-protected files.
